FIELD VISIT REPORT 2021

Name of event	Field Visit to Water Treatment Plant, Bhopal
Date of event	21/10/2021
Participants	86
Resource person	Dr Varsha Sharma of Department of Public Health Dentistry.
Aim and objective of the visit	<ol style="list-style-type: none">1. To develop knowledge and understanding of various stages involved in water purification on large scale.2. To gain knowledge about various type of contaminations present in water.3. To develop attitude and capabilities of water conservation and various aid in prevention of water.
Report	<p>CAPACITY – 225 LAKH LTR PER DAY</p> <p>7 STEPS</p> <p>These include:</p> <ol style="list-style-type: none">(1) Collection ;(2) Screening and Straining ;(3) Chemical Addition ;(4) Coagulation and Flocculation ;(5) Sedimentation and Clarification ;(6) Filtration ;(7) Disinfection ;(8) Storage ;(9) and finally Distribution. <p>Collection. Before the water can be treated, it must first be collected from lakes, rivers and reservoirs. Most often, the water is transported from the source to the treatment plant via a complex network of pumps and pipelines, though natural means (such as rivers) may be used.</p> <p>Screening. The first step in the treatment process is to screen the water to remove larger items of suspended materials, such as rubbish, plants, trees, animals and other debris. As the name suggests, these are captured and removed via the use of a large metal screen.</p> <p>Chemical addition. At this point, chemicals are now added to encourage smaller particles of suspended matter to clump together and form "floc". The chemicals used to achieve this purpose are called coagulants and there are many different products available.</p> <p>Coagulation. After the coagulant has been added to the water, it must be mixed at varying speeds over a period of time to allow the flocs to form (this part of the process is known as flocculation).</p>

Sedimentation and clarification. Once the flocs have formed, the water is passed over a sedimentation basin. Here, the clumps of floc particles can settle at the bottom of the basin, where they are removed to a disposal pond.

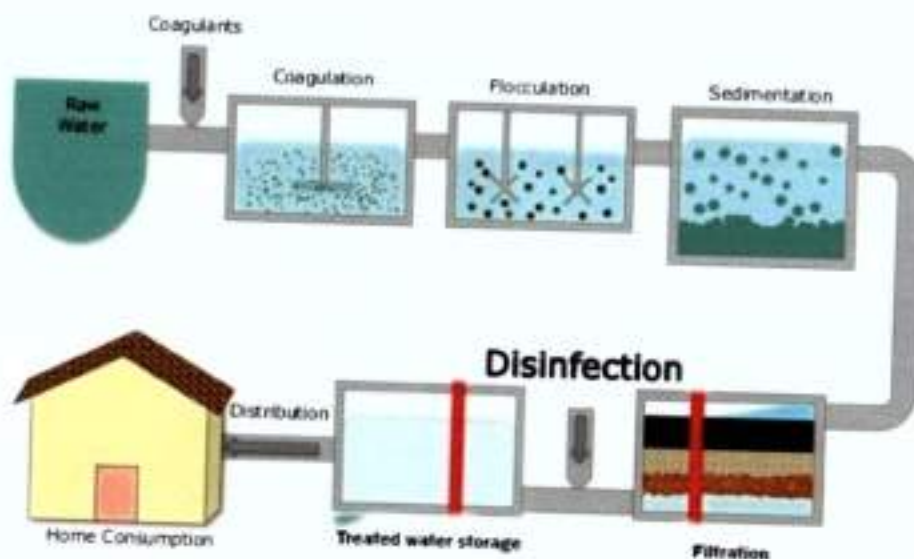

Filtration. With the larger particles taken out of the water, it must now be filtered through a variety of media such as sand, gravel or granular activated carbon to remove the smaller unwanted particles which still persist.

Disinfection. The remaining water has now had the vast majority of its impurities removed, but it may still contain bacteria, viruses and other microorganisms. In order to kill these elements, it must be treated with enough chlorine to be effective but not too much to affect taste or odour.

Storage. The water is now essentially ready for public consumption, but must be stored until demand for it surfaces. It is most commonly stored in underground or overground tanks.

As well as drinking water, there must also be a stored supply of water for emergencies such as fires.

Distribution. The water is finally sent to homes and businesses around the country via a sophisticated system of pumps, tanks, pipelines, hydrants, valves and meters.

COMPULSORY ROTATING INTERNSHIP COMPLETION CERTIFICATE

Certificate No. **BHOPAL/MDC16-17/018**

This is to certify that **NANDITA KUMARI**
S/o, D/o **SHRI YOGENDRA KUMAR** has completed one year of
compulsory rotating internship from **26/05/2021** to **17/06/2022** in
our college, including repetition / extension as mentioned below.

The details of the posting are as under:

S.No.	DEPARTMENT	DURATION OF POSTING
1	Orthodontics & Dentofacial Orthopaedics	1 Month
2	Pediatric & Preventive Dentistry	1 Month
3	Conservative Dentistry & Endodontics	1 Month
4	Periodontology	1 Month
5	Oral Medicine & Radiology	1 Month
6	Oral Pathology & Microbiology	15 Days
7	Public Health Dentistry	3 Months
8	Prosthodontics and Crown & Bridge	1½ Months
9	Oral & Maxillofacial Surgery	1½ Months
10	Elective	15 Days

- Extension posting completed from **25/05/2022** to **17/06/2022**
- During the above training period his/her character, conduct and working was found to be satisfactory.
- B.D.S. Course recognised by Dental Council of India and Ministry of Health & Family Welfare, Govt. of India, New Delhi, Vide Letter No. F.No. V. 12017/99/2005-DE, dated 31.10.2011.

Date: **23/06/2022**

Research Projects for the session 2021-2022

This is to certify that the following Post Graduate MDS Course Students of Mansarovar Dental College, Bhopal have completed their research projects for the session 2021-2022.

S.NO.	NAME OF THE STUDENTS	TOPIC	DEPARTMENT NAME	STATUS
1	Dr. Ashish Khandelwal	Comparative evaluation of the effects of glide path preparation with different file system on apical extrusion of debris in curved root canals - <i>An in vitro</i> study	Conservative Dentistry & Endodontics	Completed
2	Dr. Prashant Ghargine	Comparative evaluation of superoxide dismutase, sodium ascorbate and quercetin on reversal of shear bond strength of bleached enamel - <i>An in vitro</i> study	Conservative Dentistry & Endodontics	Completed
3	Dr. Nishu Singh	Comparative evaluation of effects of Protaper Universal and Endostar RE rotary retreatment instruments on the incidence of dentinal defects during the removal of root canal filling materials - <i>An in vitro</i> study	Conservative Dentistry & Endodontics	Completed
4	Dr. Vrushali M Mahajan	Comparative evaluation of two different rotary instrumentation systems for removal of gutta-percha from root canal during endodontic retreatment with and without solvent - <i>An in vitro</i> study	Conservative Dentistry & Endodontics	In Progress
5	Dr. Sincy Kurian	Comparative evaluation of preparation time required for gutta percha removal by ProTaper and Endostar RE retreatment file systems with and without solvent - <i>An in vitro</i> study	Conservative Dentistry & Endodontics	In Progress
6	Dr. Ojaswini P. Pawar	Efficacy of Finisher Gentlefile Brush, XP-Endo Finisher and Passive Ultrasonic Irrigation on the removal of an oil-based calcium hydroxide paste from the root canals - <i>An in vitro</i> Study	Conservative Dentistry & Endodontics	In Progress
7	Dr. S. Vidhya Bharathy	Correlation of upper airway spaces and soft tissue profile in different facial and skeletal types	Orthodontics and Dentofacial Orthopaedics	In Progress
8	Dr. Sukriti Yadav	Evaluation of Beta angle and its correlation with various antero posterior discrepancy indicators	Orthodontics and Dentofacial Orthopaedics	In Progress
9	Dr. Priyank Dubey	Variations in dental arch width in relation with age group from 8 to 16 years in central India population; <i>A cross-sectional study</i>	Orthodontics and Dentofacial Orthopaedics	Completed

S.NO.	NAME OF THE STUDENTS	TOPIC	DEPARTMENT NAME	STATUS
10	Dr. Benet Babu	Evaluation of soft tissue Cephalometric norms for Holdaway & Ricketts analysis in Bhopal population.	Orthodontics and Dentofacial Orthopaedics	Completed
11	Dr. Vrushali Nakhale	The effect of indocyanine green mediated photodynamic therapy and ozonated olive oil as an adjunct to SRP in the treatment of chronic Periodontitis - A Randomized Control Trial	Periodontology	In Progress
12	Dr. Madhu Chander	Evaluating the efficacy of chlorhexidine chip and laser therapy as an adjunct to SRP in the treatment of chronic periodontitis - A Randomized Control Trial	Periodontology	In Progress
13	Dr. Dornala Shyamsunder Reddy	A comparative evaluation of clinical efficiency of diode laser assisted flap surgery with that of conventional flap surgery in treatment of chronic periodontics.	Periodontology	Completed
14	Dr. Shivaramakrishna Aila	Evaluating the efficacy of three non-surgical Periodontal treatment modalities in treatment of chronic periodontitis.	Periodontology	Completed
15	Dr. Sagar Gupta	To determine the efficacy of photodynamic and low-level laser therapy as an adjunct to scaling and root panning in treatment of chronic periodontitis - A clinical and microbiological study	Periodontology	Completed
16	Dr. Aditi Asheesh Sharma	Comparative evaluation of impact strength of two denture base resins under two processing techniques by incorporating Titanium Dioxide Nanoparticles in 1.5 W/W% and 3.5 W/W % - An in vitro study	Prosthodontics, Crown & Bridge	In Progress
17	Dr. G. Balamurgan	Comparative evaluation of fluid absorbancy of retraction cord after immersing in two alpha adrenomimetic medicaments - An in vitro study	Prosthodontics, Crown & Bridge	In Progress
18	Dr. Ngangbam Johnson Singh	Comparative evaluation of dimensional stability and surface hardness of two polyvinyl siloxane interocclusal recording material at various time interval - An in Vitro Study.	Prosthodontics, Crown & Bridge	In Progress
