

CYBER SECURITY: SAFETY AWARENESS

STAY SAFE IN THE DIGITAL WORLD

OVERVIEW: This blog tells or talk about the importance of cyber security in today's digital era especially for students. This blog focuses on safety awareness and some useful tips to stay protected online or may offline also.

CYBER SECURITY:

What is cyber security? :- cyber security means protecting our day to day devices such PHONES, TABLETS, COMPUTERS, etc and personal data from Hackers, Viruses, and many other online threats.

SAFETY AWARENESS: In today's era safety awareness from cyber fraud is important. Safety awareness means knowing the risks which can be happen online and being careful from them and learning how to stay safe online.

Many students in nowadays also don't realize that a simple mistake, clicking a wrong link can get their personal information and there life in problem. Also sharing too much personal information to an unknown software or website can lead to big problems. By looking good online habits and spreading awareness we can help others and become more careful against today's

'cyber fraud'.

TIP'S AND SUGGESTION

- Avoid sharing personal information: Never give your personal information to an unknown website or an unknown person call's. Never post Phone number, Address, password's, etc on public websites.
- Use strong passwords: Never give your password or any OTP to someone. Use strong passwords which mix some letters, numbers, and symbols. Don't use password like '1234' or 'password'.
- Avoid clicking unknown links: always use trusted websites, never click on unknown links they can contain viruses or scams which can steal your personal information.
- Report any suspicious things: if you feel something uncomfortable or something odd online or while an unknown person's, call or tell to adults or report nearby police station or cyber station.

MORE ABOUT CYBER FRAUD/ CYBER SAFETY:

In today's digital world technology is constantly growing. As technology grows cyber threats are also growing. This is why it's important to always stay update and learn about safety just once. Schools, government, collages, communities should work together to teach and aware about digital safety. Learning how to respond, block, and report such things are essential. Encouraging kindness and promoting a safe digital environment.

CONCLUSION:

Cyber security isn't just for adult or professionals- its for everyone. As a good human being, we must become smart digital users. With the right knowledge we can stop cyber fraud and enjoy the benefits of internet while staying safe online. Let's become cyber-smart and help to build safer digital world.
